Forecast for Monday 02 Sep 2024

Weather: A rather cloudy day, with outbreaks of light rain and drizzle at times. Cloud and rain gradually clearing to the east, although timing of this is a little uncertain, with perhaps drier and brighter conditions developing by late-afternoon and into the evening.

Chance of cloud-free hill tops above 700m: 20% becoming 60% by the end of the day.

Low cloud and visibility: Cloud bases down to 400-500m during the morning, lifting to above the summits by late-afternoon and evening. Visibility will be poor or very poor in low cloud and outbreaks of rain or drizzle during the morning, becoming good by the evening.

Meteorologist's View

Footpaths and walkways may become slippery due to the damp conditions throughout the morning. Suitable footwear is advisable.

Forecast for Tuesday 03 Sep 2024

Weather: Dry with variable cloud and clear spells overnight, with the chance of some mist and fog patches forming in valleys. Early mist and fog soon lifting to low cloud, which will thin and break to give some bright or sunny spells throughout the day. However, there is likely to be some scattered showers during the afternoon. Any showers fading by the evening, with clear spells.

Maximum wind: West to northwesterly 10-15mph gusting 25 mph at times.

Chance of cloud-free hill tops above 700m: 20% early morning, becoming 90%.

Low cloud and visibility: Patchy low cloud and fog early morning, bases down to 200-300m possibly, lifting above the summits by mid-morning. Poor or very poor visibility in low cloud and valley fog early morning, becoming good or excellent, with distant hills visible by the afternoon.

Temperature: **Valleys:** Plus 8 Celsius, becoming Plus 17 Celsius.
At 700m: Plus 9 Celsius, becoming Plus 12 Celsius.
Freezing level: Above the summits.
